

WOMEN'S PARTICIPATION IN TRADES AND TECH

Tradeswomen Australia (TWA) is delighted to announce our commitment as a project partner led by The Australian Manufacturing Workers' Union (AMWU) for the *Women's participation in Trades and Tech Building Women's Careers (BWC)* Program. We are enthusiastic continuing our commitment to encourage more women in trades by contributing our extensive experience and expertise in promoting gender equity in the trades sector and supporting career advancement for women.

Collaboration Overview:

TWA will work collaboratively with AMWU and other project partners to successfully deliver the project. We will contribute to designing and facilitating impactful sessions, developing action plans, and delivering tailored training workshops to build the capacity of the 30-40 participating trade organisations.

Experience and Expertise:

TWA Group Tradeswomen Australia Group (TWA) is a non-profit organisation working to increase the representation of women in skilled trade roles and create safe workplaces for everyone. We aim for gender equality and empowerment for all women to access, participate and succeed in trades.

With over a decade of experience, we've been working hard to increase female representation to more than 2% of Australia's trade industry workforce. While the challenge is considerable, with many barriers in place, we're getting closer every day thanks to the help of our community partners, our qualified employers and supporters. If we work together, we believe all women from all backgrounds can succeed in trades careers.

TWA brings deep knowledge in the following areas:

- Development and facilitation of gender equity programs and training.
- Customised action plans tailored to workplace needs.
- Community-led and collaborative project management and delivery.

As a project partner, TWA will undertake contribute to the development and design and delivery of the project. Please see link to the The Australian Manufacturing Workers' Union (AMWU) federal grant announcement [here](#).
